

Corporate Overview

Definitive Results

Our service offerings navigate a comprehensive view of your organization's requirements. Combining international and industry standards-based practices that fit Federal compliance, we assist you in setting the right course to achieve your goals and objectives from initiation to close while delivering control on cost, scope and quality.

It requires focus and unwavering commitment to see programs and projects through to realization. In a sea of best practices - you require individualization and specific tailoring to your organization while understanding what works.... and what doesn't. Whether stakeholders are internal or external — it is critical to understand the priorities and drivers that are unique to each organizations business objectives and remain unbiased to influences which may already be involved in a project. Individual efforts must be handled properly from start-up to operations - while avoid areas of potential conflict, ensuring compliance, navigate competing interests, mitigate risks, and capitalize on strategic opportunities. RSDCGROUP (RSDC) has three separate lines of business to help you achieve success:

Business Support Services

Our team integrates program management, fiscal monitoring, human competencies and risk mitigation throughout the business process to mitigate risks, realize goals and achieve results. We communicate across the full spectrum of stakeholders to avoid areas of potential conflict, navigate priorities and capitalize on strategic opportunities. We provide:

Strategic and Organizational Development

Programmatic Management

Budget and Finance Excellence

Talent Development and Management

Enterprise Assurance

Our team provides a wide variety of security and program assessment, engineering, and compliance services to help your organization identify and address security and policy concerns before they become problems.

Security Policy and Program Development

Security Design and Implementation

Security Compliance
