**Distributed Web Applications
SharePoint
PKI**

Specialists in Distributed Web Applications

1. How We help you

- We are a team of DOD & DHS cleared architect level developers available on quick notice. We fit in best when you need high quality distributed web applications delivered on short notice
- We take leadership & responsibility while delivering technical services thus freeing you to focus more on customer relationship than on vendor management
- We minimize project risk with a regular reporting structure followed by industry recommended practices in software development and project management

NAICS CODES

- 541511
- 541512
- 541513
- 541519

2. Capabilities

- Design & Develop scalable and distributed web applications right from Requirement Gathering to deploying the final solution on Load Balanced web farms
- Seamlessly integrate multiple, complex & diverse technologies into one homogenous solution – distributed web development, identity management, Security, Bio Metrics & PKI
- Microsoft Certified Professionals and Solution Architects

3. Experience

#	Service	Summary	Customer
1.	Migration	Meta-Data driven Web Application in .NET MVC	DHS ICE
2.	Development	Distributed Web Application with Web Security	DHS TSA
3.	Development	HSPD-12 Federal Identity Credentialing & Access	GSA/Northrop
4.	Integration	Analyze and redesign CERTS system	DHS CBP
5.	Development	Integrating new & existing PKI deployments	DOD ARMY
6.	Development	Custom Web Development	DOS ESOC
7.	Development	Secure and Scalable SharePoint farm	DOD NAVY

4. Technology

Area	Technologies
