How our support services may assist the Department of Veteran Affairs

We have relevant and proven past performance in three specific functional areas that can greatly assist current and future programs supporting VA manpower and policy support initiatives.

Marine Corps Vision and Strategy (MCV&S) 2025 Support – II Corps was the principal author of three high-level implementation plans supporting the Commandant of the Marine Corps' vision in the future training and education of Marines out to year 2025. We conducted detailed research and analysis on training requirements supporting small unit decision-making, training modeling & simulation, and training & education policy management. II Corps produced and staffed policy directives impacting doctrine, organizational, training, material, leadership & education, personnel, facilities, and policy (DOTMLPF-P) changes aimed at improving the combat readiness of Marines worldwide.

Leadership Policy and Doctrine Support – II Corps was the principal authors of three leadership doctrinal publications supporting Marine Corps leadership initiatives in the areas of counseling, coaching, and mentoring. This effort was the catalyst for standardization of leadership doctrinal tenets and best practices for documenting Marine Corps leadership policy, training, and education.

Workforce Management & Resource Allocation Support – II Corps has developed and successfully executed workforce management solutions for the Marine Corps. Through a detailed and proven process consisting of research, analysis, data collection/site visits, data reduction, and documented reporting of results, we have assisted the Marine Corps in resource allocation for manpower and policy development. II Corps is capable of providing the customer with the ability to make informed resource decisions and allocations. This is largely completed through the use of focused interviews and computer-based assessment tools by skilled II Corps professionals.
