

Get positioned to **transform** your enterprise **performance...**

Definitive Logic is an employee-owned and operated organization delivering performance-based management consulting and information technology services to government and commercial clients. We aspire to be the first choice for clients seeking innovative, efficient, and no-nonsense problem solving. Our expertise and approach put us ahead of the competition, and our effort and dedication to our customers keeps them coming back.

Our approach (A⁶) is repeatable and proven...

Audit: First, we review your current practices, systems, and assets for analytical readiness

Analyze: We then examine the results of the audit to determine alternative solutions and appropriate recommendations for enhanced analytics.

Assemble: Next, we assemble the data and tools that deliver improved decision making. This solution is often delivered as a pilot or *Beta*.

Apply: After the new solution is tested, we put it into production and apply it in real-world scenarios.

Assess: Practical application of your new solution reveals additional enhancement opportunities, which we jointly assess and prioritize.

Adapt: Finally, we adjust the practices and technologies based on what we've learned.

Our Services

- ★ Enterprise Strategy and Architecture, Services Oriented Architecture
- ★ Application Development, Systems Integration
- ★ Identity Management, Biometrics, RFID
- ★ Business Intelligence, Data Warehousing
- ★ Business Process Management, Lean Six Sigma

We help automate your business processes so you can focus on your business.

Customer Success ⇒ U.S. Army Corp of Engineers (USACE)

The USACE has reduced their IT spend by millions of dollars and increased cycle times for key metrics by months. This is made possible with Definitive Logic's expert guidance and implementation experience in business intelligence, reducing the reliance on systems that do not integrate their data.

Definitive Logic helps organizations transform their performance through three core lines of business

1. **Business intelligence and analytics** solutions for enhanced decision making.
2. **Application development and integration** services to enabling performance breakthroughs.
3. **Testing and evaluation** for assuring the effectiveness and suitability of transformation investments.

We employ the top talent in our industry and apply a proven approach that focuses on achieving practical results quickly and directs investments to the areas of highest return. Our formula has resulted in consistent, repeatable success.
