WHAT WE DO FOR MOBILE DEVELOPMENT?

Concept Plus designs and develops high quality mobile applications using cross-platform frameworks. We build feature-rich mobile apps that run on both iPhone and Android. We are helping to streamline the app building process so that everyone can produce apps that are interactive and rich in multimedia and social networking functionality. Our teams of developers create apps for open source mobile frameworks such as Android, iPhone and iPad. We provide mobile solutions and Android web services that encompass Strategy, Design, Development, Promotion and Maintenance with specific services including:

- Code custom apps with cross-platform development frameworks
- Set up apps for enterprises across software systems, web interfaces and mobile devices to support business data
- Build a wide range of Android apps and cross platform mobile apps and solutions
- Create native mobile apps for Android and iPhone
- Distribute apps via internal and public mobile marketplaces
- Customize, integrate, install, deploy and implement open source packages
- Integrate social media such as Twitter and Facebook
- Create custom third-party API integration, such as Oracle E-Business Suite, Amazon EC2 / S3 and many more.
