## WHAT WE DO...

---

### Integrated and Tailored Solutions

**Analytical Decision Support and Requirements Development** --- II Corps (Second Corps) Consultants Inc. provides the resources and human capital capable of producing informed and dynamic analytical decision support products and solutions custom tailored to meet the needs of our clients. Through the implementation of proven methodologies and processess, II Corps professionals provide the knowledge, experience, tools, and analytical rigor to address the most complex of resource efforts. In addition, II Corps has a comprehensive understanding of capabilities based planning processes to include Joint Capabilities Integration Development System (JCIDS), Planning, Programming, Budgeting, & Execution Process (PPB&E), and the Defense Acquisition System (DAS). Our consultants have produced numerous requirements documents which enabled our clients to acquire future capabilities and increase their warfighting capacities contributing to mission success.

**End-to End Instructional Systems Analysis, Design, Development, Implementation, and Evaluation** --- II Corps (Second Corps) Consultants Inc. conducts end-to-end training and education solutions using proven instructional systems design methods to analyze, design, develop, implement, and evaluate (ADDIE) current courseware or develop new curriculum. Whether conducting instructional delivery of an established program of instruction, or development of interactive E-Learning solutions in support of distance learning requirements, our team of dedicated professionals provides a thorough understanding, relevant experience, and proven past-performance documenting our ability to fulfill critical training and educational needs for our clients.

**Enterprise Information Technology Solutions** --- II Corps (Second Corps) Consultants Inc. professionals provide the experience, technical skill-sets, and an integrated approach addressing the application of enterprise information technology solutions meeting the needs of our clients. Our team of professionals provides critical capabilities to our clients including information systems development, the creation of data structures and schemes, web-site design and advanced applications, as well as database management. Through experience and a proven track-record our consultants translate customer requirements into functional, transformational, dynamic, and customized software solutions.
