

Mission:

Provide professional and customized solutions to fulfill the needs of our clients, and to offer a wide variety of Program Management, Acquisition, Logistics, Engineering, Information Technology and Telecommunication consultants and services to our clients.

We offer only qualified and well-trained professionals to perform these services, including per-diem consulting based on time and materials, as well as project based consultants on a performance-based delivery schedule.

Products and Services

- Logistics and Life Support Services
- New Equipment Training, Fielding, and Deprocessing
- Product and Acquisition Lifecycle Mgmt
- Program and Turnaround Management
- Systems Engineering and Enterprise Architecture
- Enterprise Search
- BPMS and Operational/Business Transformation

Key benefits and Features of SPS:

Acquisition Support

- Program Management
- Project Management
- Strategy and Support

Test and Evaluation

- Test and Evaluation Master Plan
- Test Integration
- Test Verification and Validation

Systems Engineering

- Total System Analysis
- Obsolescence
- New Equipment Integration
- Test and Evaluation
- Telecommunication Configuration Management
- PDR/CDR/SDR

Systems Integration

- Configuration Management
- Network Design & Implementation

Application Development

- Configuration Management

Integrated Logistics Support

- Master Schedule
- Reliability, Availability, Maintainability, Supportability
- Fielding Plan

Training

- Training Development
- New Equipment Training
- Instruction/Distance Learning
- Logistics Training Support
- Training/Rehearsal Support
- Network/Training Infrastructure
- Multimodal Learning
