Innovative services to manage
your business needs

PROGRAM/PROJECT MANAGEMENT

TISTA's program/project management experience includes managing scope, cost, and schedule with appropriate planning and staffing to meet client objectives. TISTA Program Managers exercise program management skills based on the practices of the Project Management Institute (PMI) and the structured processes of ISO and CMMI. Our project management professionals and acquisition managers support the **Internal Revenue Service, National Guard Bureau, U.S. Department of Agriculture, and the Department of Veteran Affairs**.

CYBER SECURITY/INFORMATION ASSURANCE

TISTA provides complete and comprehensive support for cyber security services and Information Assurance (IA) programs that assess and implement integrated solutions for physical, technical, operations, personnel, computer, and communication security requirements, including disaster recovery assessment. Our services include systems security architecture development, test and evaluation, certification and accreditation (C&A) support, compliance audits, and inspections for client-server or web-based environments. Our work at the **U.S. Department of Agriculture (USDA FSIS)**, **Internal Revenue Service, Defense Information Systems Agency, Defense Logistics Agency, National Institutes of Health (NIH), and Department of Veterans Affairs** includes review of applicable security disciplines and controls to identify systems requirements and ensure system/data availability, integrity, and confidentiality.

APPLICATION DEVELOPMENT

TISTA brings extensive experience in developing and maintaining applications and websites, working with both Federal and commercial entities. TISTA has leveraged the Agile development methodology to completely redesign a major intranet site at the **Internal Revenue Service**. TISTA supports the **Defense Information Systems Agency (DISA) Joint Spectrum Center (JSC)** in maintaining and deploying multiple high-visibility web-based applications compliant with the constantly evolving guidelines and policies of the Department of Defense (DoD) and the DISA. At the **Marine Corps** TISTA's support includes database management, applications management, web and OS support, RAC management, mainframe support, enterprise backup and recovery, system architecture support, and application software support (analytical, testing, and programming). In addition, TISTA is spearheading the development of social media applications on the Facebook platform, and mobile-based applications.

OPERATIONS AND MAINTENANCE

TISTA supports our clients at various levels of operations and maintenance including patch management, configuration management, virtualization with OS hardening, etc. TISTA's approach to providing help desk support comes from providing exceptional IT operational support services following the ITIL framework at the **Defense Information Systems Agency (DISA), Office of Personnel Management (OPM),** and at the **National Institutes of Health (NIH)**. Our proven method allows our clients to experience a higher percentage of first-call resolution. By creating repeatable processes and properly documenting and communicating these processes, we continue to minimize support costs and ensure high levels of user satisfaction, enhance productivity, and effectively use resources.

SYSTEMS INTEGRATION

TISTA's experienced IT professionals provide the technical services necessary to design, operate, and maintain enterprise-wide systems within the **Department of Veterans Affairs, Defense Information Systems Agency, National Institutes of Health, Marine Corps,** and the **Internal Revenue Service**. Our IT solutions address security and affordability requirements in every major segment of the network environment (network applications, middleware, LAN, and WAN) to ensure appropriate functionality, performance, manageability, and compatibility for our clients. At **CISCO** our team works on the development and integration of a comprehensive IP-based dispatch and incidence response solution.

CONSULTING

TISTA's consultants provide subject matter expertise (SME) on a wide range of services including Agile development, contract management, Enterprise Resource Planning (ERP) and data-warehousing solutions. Our consultants possess years of diverse industry experience; many have served in executive and management roles. This level of experience allows our consultant team to provide valuable solutions based on real-world experience. Our experience includes defining the Agile path for application development, enterprise lifecycle training, conducting market research, developing a strategy for secure communications, compiling an inventory of security compliance tools/applications for the **IRS**.
