CSF's Senior Staff has extensive IT Technical and Acquisition experience. CSF provides Program Management, Engineering and Technical (PMET) support services to the family of enterprise information/management systems. Our approach is to implement the Life Cycle Management Framework System (LCMFS) in support of customer's programs and project leaders in Information Technology and in other organizations where vendors with structured PMET capabilities are sought.

CSF's services range from taking an IT helpdesk call to providing support for entire IT infrastructures. We service and maintain hardware and software. We provide guidance and recommendations for future upgrades or additions to help your IT infrastructure keep up with your business.

CSF is an agile small business, offering cost-effective solutions in Program Management and IT Infrastructure support.
