G2 GLOBAL SOLUTIONS

• CYBER EXPLOITATION

G2s analysis begins by identifying and isolating activity in the four attack vectors to a cyber-target:
- Remote
- Proximity
- Insider
- Supply Chain

Cyber exploitation activity can be found in any and all of these vectors. CyE follows an intuitive lifecycle process with identifiable phases and steps. G2s approach is the examination of the CyE process as a holistic and comprehensive opportunity to view activity from the adversary's perspective and facilitate the development of a targeted strategy.
