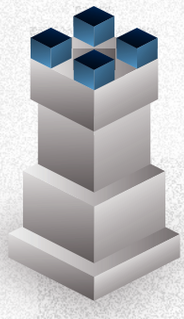
THE MOST COMPLEX CHALLENGES REQUIRE SKILL AND A RELENTLESS DRIVE TO SUCCEED.

GAME ON.



We don't believe in a one-solution-fits-all approach. Our diverse client base requires us to be innovative and impeccably accurate. Our size allows us to be flexible and fast. And we always have our sights set on your objectives. No project is too small. No goal is too big. And we deliver unparalleled results, no matter what. We've brought on some of the brightest, most seasoned consultants in the technical and programmatic business to be a part of our team. With them, we can provide the most cost-effective, best-in-class concepts to our clients, from project management to enterprise application implementation, and more.

CAPABILITIES

TECHNOLOGY SOLUTIONS

We believe that information technology should support strategic business initiatives — not the other way around. By taking a strategic approach to system engineering, IT Concepts, Inc. assists businesses moving to the next level. Once we understand the business objectives, we recommend and support proven technology solutions that drive business results. From security, network monitoring, and business continuity to information management and custom software development. Our consultants are seasoned technology professionals with many years of hands-on experience in systems engineering within the federal government space.

HUMAN CAPITAL CONSULTING

Our consultants understand that in order to achieve the mission of most federal agencies forecasting, acquiring, developing, and sustaining talent is essential. We provide unrivaled breadth and depth of human capital services to help our clients maximize the value of investments made in their people and Human Capital Systems. Our consultants have experience in HR Operations and Technology, including Learning Management, Recruiting, HR Processing, and Performance Management Systems. We provide a strategic full-cycle approach to human capital management – hire, develop, manage and retain the very best in human capital

FLEXIBLE SOLUTIONS FOR YOUR BUSINESS NEEDS

BUSINESS SOLUTIONS

We're detail oriented big picture thinkers. We zoom in on external factors and step back to get a wide-angled view. Only then do we set a game plan and define a clear plan of attack on all fronts — from business drivers and financial accountability with effective use of human capital and technology to leadership management and progress tracking. And we recognize that one solution does not fit all.

SERVICES INCLUDE:

- *Business Analysis*
- *Strategy Development and Assessments*
- *Transformation and Alignment*
- *Performance Management*
- *Training, Change Management and Communication Strategy*
- *Process Support and Staff Augmentation*

PORTFOLIO, PROGRAM AND PROJECT MANAGEMENT SERVICES

When it comes to systems and processes, we're a well-oiled machine. We have industry best practices down to a science. But sometimes, it takes good old experience to understand the inner workings of a client's project. To smooth it all out, we have certified Project and Program Managers with just the kind of hands-on expertise you need. They'll appropriately plan and monitor projects, identify and mitigate risk, work with a wide variety of resources and most importantly, deliver results.

SERVICES INCLUDE:

- *Program Integration and Transition*
- *Governance Implementation and Management*
- *Budget Planning and Execution*
- *Earned Value Management*
- *Integrated Master Schedule*
- *Full lifecycle support – Planning, Executing, Monitoring & Controlling, and Reporting*

APPLICATION MANAGEMENT

With a strategic combination of system design, development and integration services, we have successfully reduced the cost of operations, simplified business processes and created sustainable growth solutions for our clients. We're able to ensure successful system delivery by providing full lifecycle development using proven CMMI processes. But we also fearlessly explore new methodologies in training and operations so we're constantly staying steps ahead.

SERVICES INCLUDE:

- *Enterprise and Solution Architecture*
- *Requirements Definition and Analysis*
- *Full Lifecycle Software Engineering*
- *Client/Server and Web-based Application Programming*
- *Enterprise Application Implementation*
- *Configuration Management*
- *Testing and Validation*
- *Risk Management and Mitigation*
- *Database Administration and Programming*
- *System Implementation*
- *Go-live Operations and Maintenance*

OUR MISSION

Combine the drive of talented individuals with the expertise of seasoned professionals in an atmosphere of Teamwork, Integrity, Honesty and Passion to create Innovative solutions that cultivate IT and Business Excellence.

CORE VALUES

We may change our approach. We might explore new methodologies. But we will never lose sight of our core values. They define the beliefs that drive our company and dictate how our team interacts with each other, with our clients, and with suppliers.

TEAMWORK — Trust, value and genuine care for each other. Have fun in the process of working together. Always seek to strengthen our collective impact, by motivating, challenging and supporting each other to be our best at all times.

INTEGRITY & HONESTY — Hold ourselves to the highest ethical standards and have the courage to take responsibility for our words and actions. Possess self-respect and humility. Be accountable and open to team members.

PASSION — Do what we say and perform with all of our heart and soul to ensure the best result. Stay enthusiastic and own responsibility for every assignment, task and job.

INNOVATIVE — Take calculated risks, embrace imagination and creativity and bring ideas to life by developing advanced solutions that transform technology to further the mission of our clients.

EXCELLENCE — Seek flawless execution, develop a persistent desire for continuous improvement and constantly strive to achieve the highest possible standards in the quality of services and solutions we provide.
