CBAIA Focus

CBAIA Mission

CBAIA's mission is to provide highly skilled, professional subject matter experts who deliver high-quality innovative solutions and process improvement methodologies. We accomplish this by anticipating customer needs, providing expert Total Lifecycle Product Support, Program Management, Manpower Personnel and Training, and Engineering products to DoD and other government agencies while building strong long-term relationships based on mutual trust, respect, and commitment.

CBAIA Vision

Become the leading small business provider of innovative management and technical support services to DoD and other governmental agencies.

CBAIA provides a wide range of management and logistics services and our success is a result of our dedicated professionals and our results-centered management practices. We have a wealth of well qualified personnel who provide excellent service in the areas of program management, acquisition and life cycle logistics, reliability and maintainability analysis, technical documentation, fielding and sustainment and information technology support.

Core Values

Our People – We recognize and value the unique contributions each person makes to our company.

Our Customers – We recognize they are our most important stakeholders and our primary mission is helping them succeed.

Integrity – We always try to do the right thing.

Trust – We respect our CBAIA colleagues and customers and treat them as we want to be treated.

Accountability – We accept personal accountability to meet our business needs, improve our systems and help others improve their effectiveness.

Quality – We strive to execute and deliver quality in every aspect of our business.

Continuous Improvement – We believe everything can be done better.

Community Service – We recognize our responsibility to be active participants in our local communities.

Passion for Winning – We are determined to be the best at doing what matters most.

Core Capabilities – Program Management

CBAI & Associates' Project Management Professionals (PMP) employ industry standard best practices from the Project Management Body of Knowledge (PMBOK). These individuals utilize their combined knowledge and experience in diverse disciplines to control costs, manage risks and resources, and ensure the highest quality deliverable and total customer satisfaction.

CBAI & Associates' PMPs manage projects through the total Project Management Lifecycle: Initiating; Planning; Execution; Monitoring and Controlling; Closing

Our PMPs have in-depth understanding and experience in the nine Project Management Knowledge Areas:

- Integration Management
- Scope Management
- Time Management
- Cost Management
- Quality Management
- Human Resource Management
- Communications Management
- Risk Management
- Procurement Management

Core Capabilities – Logistics Management

Within the Logistics Lifecycle Management Support Services, CBAI & Associates provides the full range of **logistics “cradle-to-grave” support** throughout the Integrated Defense Acquisition, Technology, and Logistics Lifecycle Management Framework. Our expertise covers, but is not limited to:

- Initiation and support of Joint Capabilities Integration and Development System (JCIDS) development and processes
- A full range of Acquisition Logistics covering: Statutory, Regulatory and Policy requirements including Business Case Analyses; Independent Logistics Assessment (ILA); Milestone gate decisions supporting Program Acquisition Teams
- All 12 logistics elements analyses including: Computer Resources; Design Interface; Facilities & Infrastructure; Maintenance Planning & Management; Manpower & Personnel; Packaging Handling Storage & Transportation; Product Support Management; Supply Support; Support Equipment; Sustaining Engineering; Technical Data; Training & Training Support

Core Capabilities – Logistics Management

- Fielding support including: Total Asset Visibility; Quick Reaction Staging and Deployment; Equipment Specialist Support; Warranty Administration; Supply Chain Management; CONUS & OCONUS operations
- Sustainment Logistics activities throughout the Operations and Support Phase leading to disposal including In-Service Management performance metrics analyses and reporting

We economize our processes through the implementation of industry and custom toolsets providing Best Value to all of our customers. One example is the use of our licensed logistics relational database meeting the requirements of MIL-HDBK-502 and MIL-PRF-49506, MIL-STD-1388-1A and -2B, and GEIA-STD-0007 with output files supporting direct upload into DoD logistics operating systems.

Core Capabilities – Manpower, Personnel & Training

CBAIA delivers expert Manpower, Personnel, and Training (MPT) & Human Systems Integration (HSI) support. CBAIA is a recognized expert in the Human Systems Integration and Manpower, Personnel and Training fields. With staff expertise going back to 1989, CBAIA personnel have performed and lead manpower, personnel and training determination projects for Joint Service organizations, the Coast Guard, Navy, and the Marine Corps.

CBAIA staff members have completed workload and training requirements determination studies and planning on Electronic Warfare Systems, Command, Control, Communications, and Computers (C4), Aircraft (MV-22, SH60), Ships, Submarines and Support Structures, and Intelligence systems. CBAIA has a proven track record – **performing services on time and on budget.**

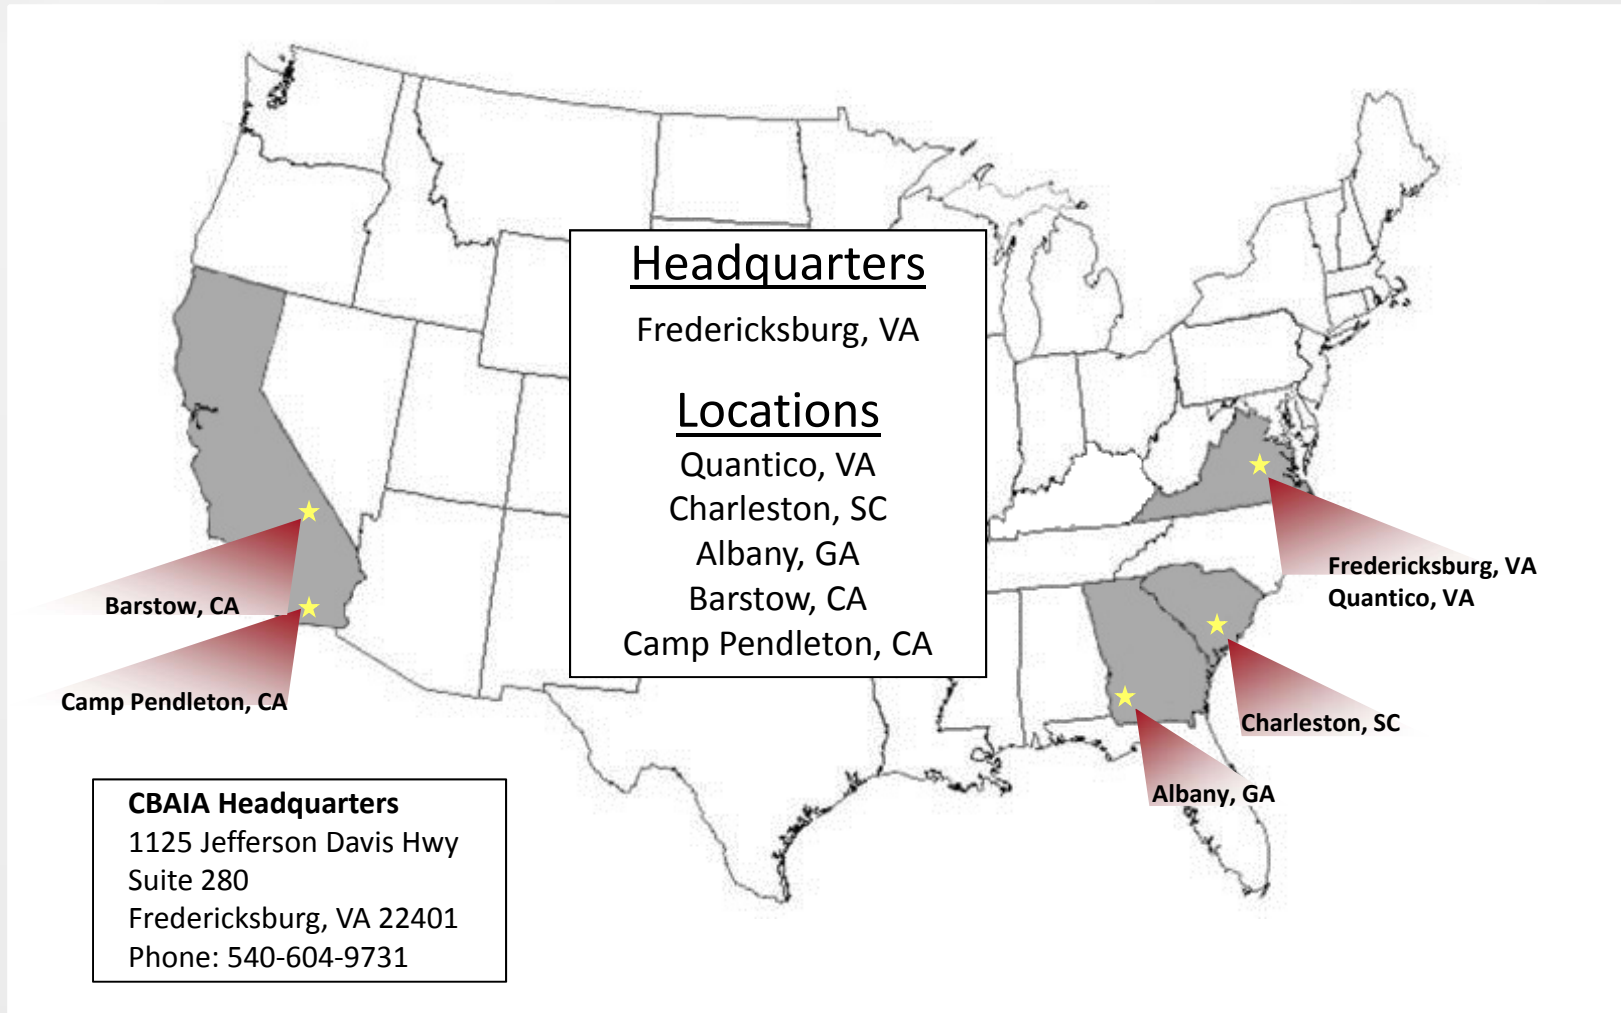

Core Capabilities – Manpower, Personnel & Training

The MPT process ensures that the Marine Corps is prepared to properly train and staff the equipment and weapon systems that are used to support combat operations.

CBAIA has accomplished retired Marines and Navy analysts on staff who conduct detailed analyses of each of the factors listed below:

- Manpower: Mission, System, Function decomposition; Workload, Wartime / Peacetime requirements; Officer / Enlisted / Civilian, Force Structure; RAM Analyses; LSAR GEIA-STD-0007 Relational Database
- Human Factors Engineering: Human Performance; Human Computer Interface (HCI); Error Avoidance; Top Down Analysis; Usability Maintainability; Maintainability Accessibility
- Personnel: Classification, Skill SET; Manning Concepts
- DOTMLPF Analysis of Alternatives: Requirements Analysis; Concept of Employment; Concept of Operations; Baseline Comparison
- Training: Training Task Needs Analysis; Knowledge, Skill & Abilities; Individual and Team Training; Most Efficient & Effective Training Methods
- Training Analysis: Validate Operator tasks; Validate Maintainer tasks; Validate training tasks; RAM Analyses; Provide recommendations; Support Integrated Product Team (IPT) meeting
