Corporate Overview

Apprio, Inc. is a certified 8(a) small disadvantaged business offering results-oriented technical and professional services to federal health agencies over the last 17 years. Our credentialed technology and clinical professionals provide quality, proven global health solutions. Senior leadership and subject matter experts include a medical doctor as the chief medical information officer, several registered nurses, ITIL®-certified engineers, PMI®-certified project managers, and multiple Lean Six Sigma Belts. Our dedication to quality is underscored by our ISO 9001: 2008 and CMMI ML3 certifications to further enhance our client-focused mission. Support to our clients include the following:

- Development of an EHR used for managing the US government's medical response to federally declared disasters and national security events (e.g. Hurricane Ike, presidential inaugurations, Haiti earthquake, etc.).

- A web-based patient tracking application used for managing continuity of care between various medical practitioners including DoD, VA and state response organizations.
- Program Management support to the Federal Health Architecture to coordinate the Health Information Technology efforts of nearly two dozen federal agencies that provide health care services, including VA.

Our Philosophy:

Today's organizations measure success on many dimensions. This requires leading health technology firms to apply a different approach to solving problems. Integrated Thinking, one of Apprio's guiding principles, challenges us to broadly collaborate, look at the entire problem, map the transition, and focus on outcomes. Integrated Thinking puts us in the best position to help our clients transform and solve today's most complex business challenges.

Relevant Projects:

- VA CRMBS INCEP
- VA CHEP Clinical Tracking System VA MRECC
- VA CHEP Homelessness Clinical Tracking System
- Coast Guard EHR Implementation
- Army Medical Information Suite Demonstration
- Army Reserve Clinical Credentialing
- Coast Guard Clinical Credentialing
- Federal Health Architecture Program Support
- CMS EDI and ICD-10 Support
- ASPR Disaster Medical Information Suite
- FDA Social Media Monitoring and Analysis
- CDC Puerto Rico Immunization Registration

Veterans Affairs Experience:

Through our support of federal health IT projects, we interface or provide direct support to VA in various capacities, and have direct knowledge of VA specific requirements, tools, methodologies - Apprio staff have VA clearances and experience navigating ProPath and aligning to the VA Program Management Accountability System. Our personnel have worked on VA projects involving ICD-10, Meaningful Use, Immunization Enhancements, National Service Desk, Clinical Decision Support, Vista Evolution APIs, Scheduling Enhancements, Joint Legacy Viewer, HIE Analysis, JALFHCC, and Clinical Information Systems.

Health Informatics, Interoperability & EHR

Apprio specializes in assisting clients reach their full potential through technology-driven solutions in a rapidly changing healthcare landscape. We specialize in Health Information and Health IT Solutions.

- Electronic Health Records development and integration
- Interoperability and Integration
- Surveillance / Epidemiology
- Patient Tracking
- Responder Health & Safety
- CONNECT / Health Internet
- NHIN Adapter and Gateway Development Services
- Meaningful Use and ICD-10

Clinical Information Systems

We are engaged in developing and integrating mobile and commercial clinical information systems for treatment facilities and operational environments for US Coast Guard. Apprio is performing clinical and safety system workflow analyses of the 'as-is' state and developing a foundation for its future state information system architecture and software development. We also support interoperability and health information exchange between the USCG, DoD, VA and private sector health systems.

Enterprise Performance Solutions

Apprio's Enterprise Performance Management services provide web-based tools to Capture, Integrate, and Report Budget and Human Resource information; uniquely developed for Federal settings. Our clients include the following Federal offices:

- HHS Office of Preparedness & Emergency Operations
- HHS Biomedical Advanced Research Authority
- HHS Office of the ASPR
- FEMA Response Division
- ONC/FHA Program Management
- CMS Electronic Data Interchange
