

# Synaptek

***Technology moving at the speed of thought***

Synaptek Corporation is an 8(a) certified small disadvantaged business (SDB) established in 2008 providing imaginative and innovative IT services and solutions to the Federal Government. Our focus is on providing mission-aligned, cost-effective enterprise solutions and support that enable the Government to leverage advanced technologies to improve services, increase efficiencies, and better perform their missions. Our current work spans IT service solutions, technical support, strategic planning, systems and software engineering, design and development, integration, implementation support, architectural development, data migration, enterprise architecture, training, enterprise network engineering, cyber security, and operations and maintenance.

Synaptek understands both the pace of technology today and the need to have a comprehensive well-planned information management environment. "Technology moving at the speed of thought" embodies these principles - the need to nimbly utilize the best that information technology offers to meet the business needs of our Government customers. As an integral part of many large enterprise projects, Synaptek has proven its ability to provide a unique service that combines the infrastructure and process models of larger organizations with the ability to flexibly and cost-effectively meet customer requirements.

## SERVICES

### SYSTEMS INTEGRATION

Synaptex implements state of the art solutions from leading OEMs including Cisco, VMware, Dell, Hewlett Packard, EMC, and NetApp. A valuable Synaptex differentiator is our close working relationships with the OEM engineers. These relationships enable us to maximize the value brought by the vendors by ensuring that the entire engineering and installation team from vendor to customer fully understands how to optimize solutions to best serve each customer's business needs and mission objectives.

### APPLICATION DEVELOPMENT

Synaptex has supported complex applications in the government administrative, healthcare and financial areas, integrating custom applications with COTS products. Our developers provide expertise in both open source and commercial technologies and work collaboratively within larger development teams. Synaptex develops applications on mobile device platforms.

### OPERATIONS SUPPORT

Synaptex understands that our customers' systems must be available and effective to maximize the value of their investments in IT. Our operations support model establishes high availability environments and then applies a best practice process framework from the data center to the service desk. Leveraging IT Service Management and state of the art data center virtualization and provisioning technologies, Synaptex helps our customers achieve high service availability at the lowest cost.

### PROGRAM MANAGEMENT

Synaptex fully leverages industry best practices from ISO/IEC, SEI, and PMI. We incorporate these practices in each of our programs and have supported defining and adopting broader process models within our customer's environment. Our strength is finding the right, tailorable processes that allows for predictable performance within a continuous improvement environment allowing for innovation.
