Delaney Advantage Technologies, LLC

"Above Service, Beyond Solution"

CAPABILITY STATEMENT

Company Background

Delaney Advantage Technologies, LLC is a Verified Service-Disabled Veteran-Owned Small Business (SDVOSB) with the Department of Veteran Affairs (VA), that specializes in sustainable Information Technology solutions for government.

Core Competencies

Cybersecurity:
- Design, develop, and deploy an active security model that encompasses multiple layers of the IT stack, including network activity, endpoints, system interactions, applications transactions and user activity monitoring to offer complete protection
- Enhance customer security posture through continuous monitoring, systems certification and information assurance, testing, policy implementation, security engineering, and incident response.

Systems Engineering & Integration:
- Provide support to all phases of a complex engineering system life cycle: requirements engineering, design, development, training, data conversion, hardware/software implementation, COTS/GOTS integration, documentation, maintenance, administration, enhancements, modifications, and end-user support of all websites, web-enabled data-entry systems, standalone and client-server applications, and collaborative computing products.

Service Desk:
- Maintain visibility through ticket management software tools to provide end-to-end visibility and drive continuous improvement by facilitating metrics tracking to exceed customer SLAs.

Software Services:
- Perform Agile, DevOps, and other methodologies, enabling superior performance across all stages of the Software Development Lifecycle (SDLC).

Representative Projects

- Encrypted data at the point of creation for ASH, using SafeNet ProtectApp
- Deployed an Adaptive Security Model for ASH with Cisco's Adaptive Security Virtual Appliance (ASAv) using VMware
- Implemented the Integrity Monitoring tool Tripwire for the public key infrastructure (PKI) of DOT and FAA
- Converted asp to asp.net for the FAA and bridged the transformation from legacy to new application solutions
- Customized Software-as-a-Service solutions such as SharePoint to meet business/mission needs of ASH
- Completed the upgrade for Identity Card Management System from Intercede MyID 9.0 to MyID 10.0 for FAA, DOT, and U.S. Commodity Futures Trading Commission
- Deployed Computer Associates (CA) Single Sign-On (SSO) and Advanced Authentication to provide PIV authentication, SSO, and multi-factor authentication between 100+ web applications across the DOT and FAA
- Upgraded an existing PKI solution for DOT/FAA from Verisign Local Hosting to a Symantec Web Services infrastructure, which included SafeNet LunaSA, Tomcat Apache 8.0, and Symantec Key Management Server
- Implemented and managed a Single Point of Contact (SPOC) Service Desk solution to support the DOT and FAA PKI Service Desk
- Provided support to 500 users of ASH for all 40-50 internal security applications
- Provided support to all FAA users for Crossmatch Store-and-Forward and e-QIP support

Differentiators

We are built primarily around the experience of our CEO, a former Chief Information Officer (CIO) for the Federal Aviation Administration (FAA) Security and Hazardous Materials Safety (ASH) Organization. This gives us both the insight into agency challenges and the foresight to address them.

Our model is a Transparent Approach, by sharing ideas and working together, with Innovative Solutions, as a strategic partner and innovator for our customers, through Effective Communication, to ensure Reliable Services, producing Empowering Results with our Dedicated Staff. **It's called The Delaney Difference.**
