Small Business

## Our Experience Highlights at Veterans Affairs

### Customers

**BUSINESS PROCESS MANAGEMENT** – With business process optimization services, we align your organization's business process with the wants and needs of your end-users, applying systematic approaches to improve your human and technology resources.

**BUSINESS RULES REPOSITORY** - ASG implemented a ILOG based rules engine management System to define, deploy, execute, monitor, and maintain decision logic that is used by VHA Enrollment system.

**REAL TIME LOCATING SYSTEM** - We've provided Real-Time Locating systems to enable VA to locate items or identify temperature changes in real time as well as to run reports and conduct analyses regarding assets, inventory levels, and location details. This solution automates workflows and alerts based on real-time data.

**STRATEGIC PLANNING** - ASG helps your organization enact a plan to help make decisions on allocating precious resources based on your organization's past activity and stated direction. We analyze your agency's history, decisions, and emerging patterns to help you continue to adapt to ever-changing environments.

**BUSINESS ARCHITECTURE** - We help you determine a blueprint that provides a common understanding of your organization that is used to align strategic objectives and tactical demands.

**GAP ANALYSIS** - Our team analyzes the difference between your organization's current "As Is" state to determine the requirements and conditions that must be met to fill the requirements of your "To Be" status. We document the interdependencies within a specific area or across your entire organization to develop a roadmap to increase your efficiency, optimize your results, and automate routine processes.

**IDENTITY and ACCESS MANAGEMENT** – IAM is one of our core competency and we have supported 3 agencies and our personnel have experience of working in 7 agencies.

**INTEGRATED ELECTRONIC HEALTH RECORD** - We provide technology solutions to implement integrated electronic health records storage and maintenance in a secure, digital format to across different healthcare settings through network-connected, enterprise-wide information systems.

**AUTOMATING CLAIMS ADJUDICATION** - We automate your healthcare claims adjudication process by implementing custom software or a web-based solution to help you manage the payment or denial of claims more efficiently. We support VHA payor claims using IBM iLOG and have an expertise in that space.

**EDI CLAIMS & FINANCIAL SERVICES MANAGEMENT** - To successfully manage the financial and administrative aspects of the healthcare business, organizations need broad connectivity with key trading partners and integration within the core practice management system. ASG provides EDI-focused integrated web-based, comprehensive, all-payor claims management solution.

**ENROLLMENT ELIGIBILITY** - ASG implements secure, comprehensive solutions for web-based benefits enrollment and eligibility verification.

**PATIENT IDENTITY** - ASG helps establish and maintain a uniform, secure technology-based solution to patient identification to provide safe, high-quality care, matching patients with their appropriate treatments/medical history. We have expertise in IBM initiate

**DISABILITY EXAMINATION MANAGEMENT** - We provide secure, end-to-end disability examination management solutions to our clients from entry of claimant into the process to disbursement.

**MENTAL HEALTH** – ASG provides end-to-end technology solutions for mental healthcare providers. Whether you need electronic appointment systems, day-to-day business management, self-service educational and assessment options, or clinical advisement from our Life Science division. We developed a mental health e-screening mobile app for VHA.

**CONTENT & KNOWLEDGE MANAGEMENT** - As the system integrator, we provide software as a service a content management (CM), Knowledge Management (KM), and eLearning (eL) solution to enable our VHA clients to share information, raw data, research, templates, and organizational artifacts across the enterprise among its users, partners, and stakeholders.

**SOFTWARE & MOBILE APP DEVELOPMENT** - ASG provides a robust host of services for Software and Mobile App development for our clients.

**CLOUD SERVICES** - ASG deploys applications to the Cloud to equip business units with agile, timely, effective and adaptable business solutions delivered rapidly and with minimal cost. We currently deploy a content management, knowledge management, and eLearning environment to the Amazon/Microsoft Cloud for our clients and offer software as a service.
