We have done our jobs ...when we have created an environment ...that hungers for more innovation
Serge Crawford, President

As we move forward, working to structure our organizations around the possibilities of innovation is significant—executing on this is pivotal. We consider this to be a defining event for which we will find our placement within the marketplace.

We Define Business Processes,
Applicable Technologies, Organizational Roles,
Competencies, Metrics & Infrastructures.....

OUR STORY

The EGRES Corporations is a woman-owned small multi-faceted business advisory firm established in 2009. The Firm exists to solve the critical issues facing our clients, both large and small. Offering specialized subject matter expertise focused primarily on the healthcare industry. The company's is comprised of a teams of subject matter consultants, clinical specialists and advisors. Individually, all have established a high degree of success and earned reputation within the global healthcare community. Through the years, we were working separately, together on various projects and initiatives. When the idea was broached to come together and work collaboratively, the decision was easy. In coming together, we leverage our knowledge, capabilities, resources, an expansive international network of medical professionals and earned reputation for exceptional work.

We Redefine, Structure,
Reconfigured & Integrate Systems
That Support New Business Strategies
