

At HealthPointe Solutions, Inc. we believe that Artificial Intelligence (AI) will redefine all aspects of how we work and live, leading to an explosion of AI-enabled business applications.

**However, most AI projects today are struggling.**

There is a gap between finding patterns in data and gaining knowledge and understanding of how data can be leveraged into business value.

Our company was formed to take advantage of a significant opportunity in the digital health and wellness marketplace, by introducing “True Cognitive Artificial Intelligence” based products and services.

We offer solutions that serve as the **brain for healthcare**

- **Clinical Interoperability**  
Real-time clinical information exchange
- **Intelligent Informatics**  
Monitoring the status of health
- **Natural Language Understanding**  
Knowledge for unstructured data sets
- **Clinically Integrated Networks**  
Outcome focused integration
- **Population and Digital Health**  
Comprehensive digital twin for all
- **Comprehensive Scheduling**  
Integrates stakeholders for shared decisions
- **Provider Workflow Optimization**  
Simplifies administrative burden of health
- **Value Based Care**  
Proactive recommendations to clinical standards of care

We have built  
the most powerful  
**Truly Cognitive  
Artificial Intelligence**  
healthcare technology  
stack in the world today

1

### Cognitive AI

Able to “think,” modeled on human thought process

2

### True Natural Language

Understands true INTENT, a generation beyond current pattern matching solutions

3

### Self-Learning Platform

Understands, learns and reasons in real time

4

### Agent Based

Decentralized cognitive agents utilized to enable our AI to be everywhere, actively monitoring

5

### Intelligent Analytics

Able to deal with missing or incorrect data, along with large amounts of unstructured and structured data in real time

## HealthPointe Cognitive Solutions

Transparent Logic Trail

Reasoning + Knowledge Base  
+ Context = Understanding

Scalability Across Workflows
