

Introduction:

The Architecture and Engineering Service (AES) team supports Corporate Services Portfolio (CSP) by providing architecture and technical expertise used to describe the current state, target state, and transition plans by Product Line.

CSP comprises four Product Lines that focus on deliverables primarily servicing the VA back office functions of Acquisition and Property Management, Financial Management, Human Capital Management, and Sec VA/Congressional/Legal Affairs.

- **Sec VA/Congressional/Legal Affairs:** consists of IT products for supporting the activities of Office of the Secretary of VA, Office of the General Counsel and Congressional Liaison operations. It also includes products for enabling regulatory activities, such as matter intake and tracking under the VA accountability and whistleblowers protection program.
- **Human Capital Management:** consists of IT products for conducting human capital management, including talent acquisition and development, employee performance and compensation management, and employee separation and retirement management.
- **Financial Management:** consists of IT products for conducting financial management activities, including budget formulation and execution, account management, payment processing, and financial performance reporting.
- **Acquisition and Property Management:** consists of IT products for conducting acquisition and performance management activities, including acquisition planning,

sourcing, contracting, purchasing, equipment and inventory management, and facilities operations.

These Product Lines include more than 150 individual systems that support CSP.
